100 % LOKAL

Papertec® 95/5 Comtex for mail order and e-commerce:

packaging for future

The BVM **Papertec® 95/5 Comtex** packaging system offers fully automatic packaging of products in a wide range of formats without changeover.

The BVM shipping system Papertec® 95/5 Comtex is a complete system for dispatch shipping in e-commerce in 95/5 paper for sending a wide variety of items directly to the customer, including address labelling.

Delivery note, invoice and items are packed in a paper bag, labelled with an address label and handed over directly to the logistics partner.

We offer you the following advantages:
- The paper has a low weight and is therefore significantly lighter than cardboard packaging
- Reduction and saving of plastic consumption.
- Space-saving compact packaging for transport
- Saves space in previous packing stations
- Advantageous ecologically footprint
- Recyclable material in accordance with packaging law (VerpackG) § 16
- Affordable packaging material
- The paper is made from renewable raw materials
- Paper with a barrier function against grease and water moisture
- Paper with high tearing resistance
- The stable sealing of the paper ensures that it fulfils all logistical requirements.
- Sealing systems without additional adhesive or hot glue
- Visible recognition fact due to the possibility of an effective advertising logo print
- Fully automatic dispatch packaging in paper with labelling

The **Papertec® 95/5 Comtex** machine, which operates fully automatically in line, can process different and alternating products dimensions within its format range. These do not need to be pre-sorted and can vary in size.

The format range of the Papertec® 95/5 Comtex is:
Product length: up to 600 mm
Product width: up to 400 mm
Product height: up to 150 mm

The output of the Papertec® 95/5 Comtex is up to 900 cycles/h

Optionally reclosable tear up perforation.
